SUMMARY

CS student at FAST NUCES with hands-on experience building AI systems, real-time ML pipelines, and full-stack applications. Proficient in LangGraph, Flutter, Node.js, FastAPI, Firebase, and React with strong DSA and system design foundations.

SKILLS

Languages C++, Python, JavaScript, Java, SQL, Dart
Frontend React.js, Flutter, HTML, CSS
Backend Node.js, Express.js, FastAPI, REST APIs
AI/ML GenAI, Agentic AI, NLP, LangGraph, LLM Pipelines, ML Kit
Tools Firebase, Git, Postman, Chrome APIs, LambdaTest, DevTools
Concepts DSA, System Design, OOP, Distributed Systems Basics

EXPERIENCE

ManaKnight Digital

Software Quality Assurance Engineer

2025 – Present

- Execute manual & regression testing across web/mobile apps ensuring functional stability, UI consistency, and release readiness.
- Perform cross-browser/device testing (LambdaTest, DevTools); validate APIs with Postman covering auth flows and edge cases.
- Conduct accessibility audits (Axe DevTools, WCAG); manage full bug lifecycle including reporting, classification, and dev coordination.

PROJECTS

FiTribe : AI Fitness & AR Gaming App

Flutter, Firebase, ML Kit

Final Year Project

2026

- Built cross-platform AI fitness app with real-time pose estimation (Google ML Kit) for live exercise correction with voice feedback.
- Designed AR Shadow Boxing game using pose landmarks, wrist velocity, and shoulder deviation — fully touch-free via front camera.
- Integrated Firebase Auth, Firestore, and real-time sync for profiles, progress tracking, and live 1v1 duels with instant scoring.
- Engineered 15+ screen UI/UX with dark-themed design optimized for performance and smooth mobile interaction.

AI-Powered Animated Video Generation System

Python, LangGraph, FastAPI

AI Engineer

2026

- Built multi-agent LangGraph pipeline converting text prompts into animated videos with generated storylines, voiceovers, and synced visuals.
- Developed screenplay generation using Groq (LLaMA 3) with Pydantic validation ensuring consistent formatting and reliable outputs.
- Architected shared JSON schema across story, audio, and video modules for synchronized multi-stage pipeline execution.
- Implemented LLM-based intent classifier for natural-language edit commands with undo/revert via SQLite state tracking.

AI Meeting Copilot : Chrome Extension

JavaScript, Deepgram, LLM APIs

AI Developer

2026

- Developed real-time Chrome extension capturing meeting audio, streaming transcription with speaker diarization, and generating AI responses.
- Integrated TabCapture, Web Audio, and MediaRecorder APIs to process mic + tab audio simultaneously for real-time understanding.
- Combined Deepgram Nova-2 with multi-model LLMs (Groq, Gemini Flash, Claude Haiku) for intelligent response generation and summarization.
- Built teleprompter for live answer delivery, post-meeting summaries, and transcript export with AI-based refinement modes.

EDUCATION

FAST NUCES, Islamabad

2022 – 2026

BS Computer Science

Dean's List - Fall 2023
